

Assignment 05

Maisy Christians

2025-06-07

Indicator 1

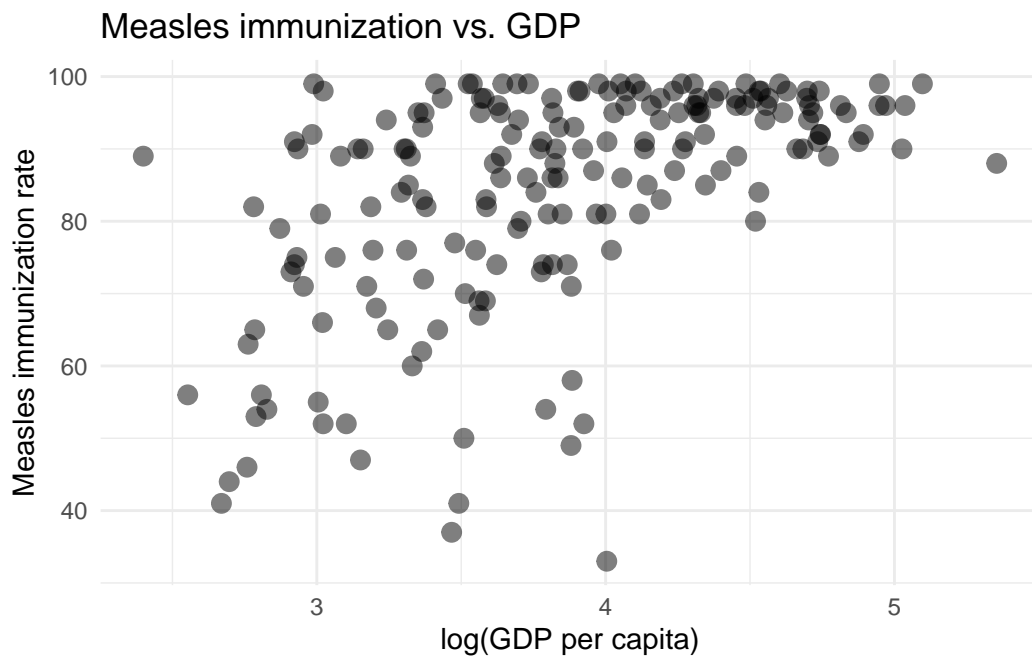

Figure 1: Source: World Development Indicators (2022)

There are no rich countries who also have low measles immunization.

Indicator 2

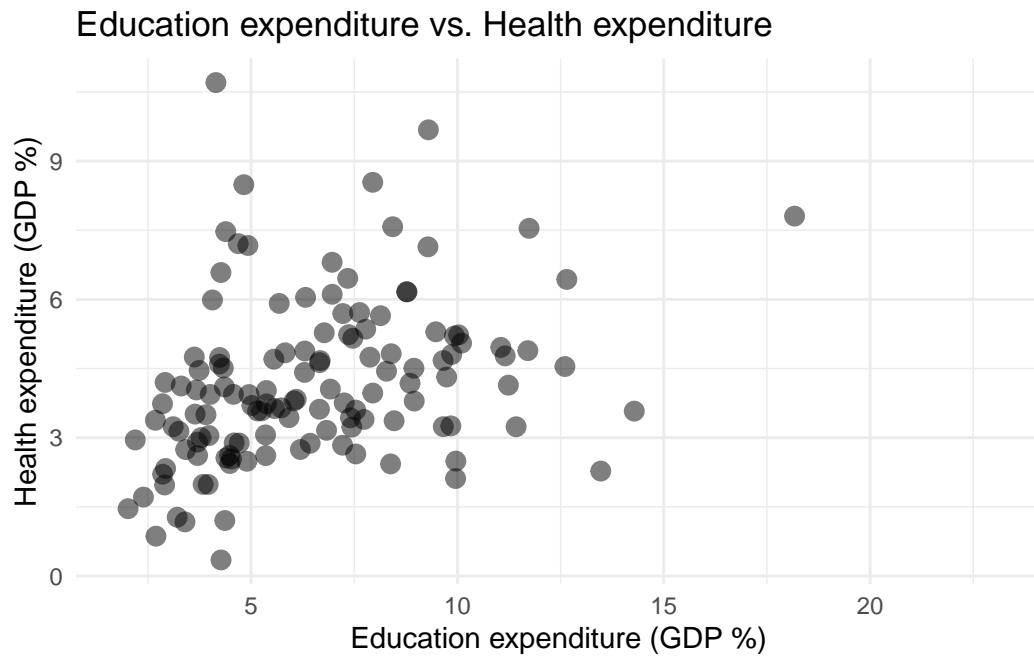

Figure 2: Source: World Development Indicators (2022)

Educational expenditure and health expenditure have a direct relationship (Mărginean 2014).

Indicator 3

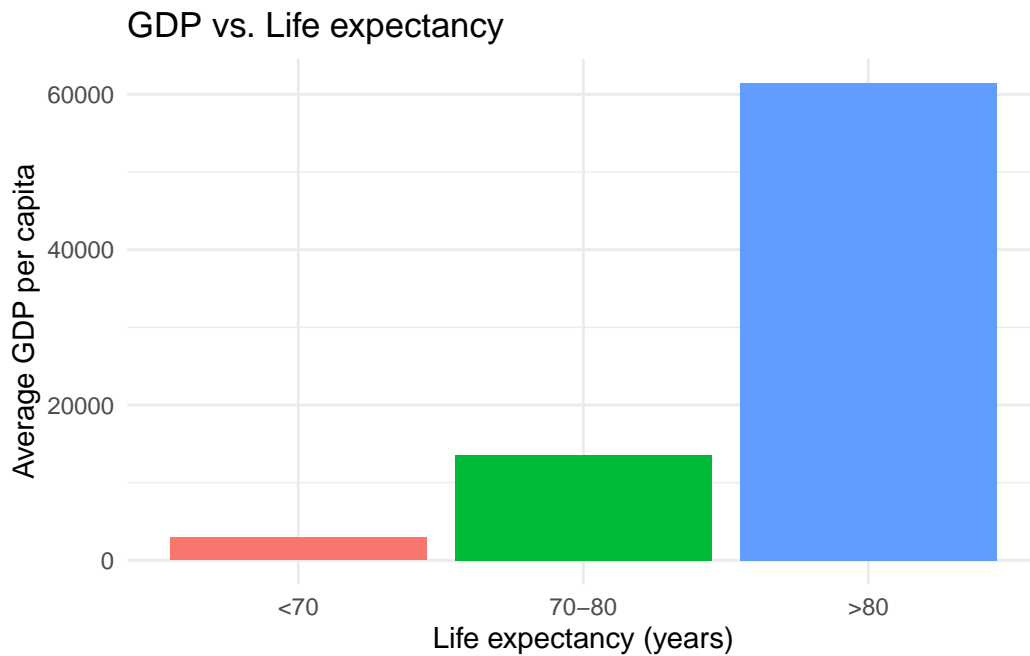

Figure 3: Source: World Development Indicators (2022)

GDP is higher for countries with greater life expectancies (Kabir 2008). See Table 1 for numbers used.

Table with key statistics

Table 1

Life expectancy (years)	# of countries	Average GDP per capita
<70	65	\$2,955
70-80	105	\$13,562
>80	47	\$61,484
